

Goals for

INNOVATIVE CURRICULUM AND PEDAGOGY

Primary Goals:

Develop innovative curricula and academic programs that support and enhance the success of our undergraduate and graduate students and prepare them for meaningful careers, lifelong learning, and engaged citizenship; and thereby maintain and enhance our position as a national leader in undergraduate and graduate education.

Supporting Goals:

- 1)** In view of the range of current curricular and pedagogical practices, to develop strategies that are in keeping with UMBC mission and values that will enable the University to enhance student learning in the future.
- 2)** To develop a fuller understanding of what opportunities and challenges demographic trends might hold for the future of UMBC's student base, and develop strategies to position the University's academic programs (including all degree and innovative non-degree credentialing options) to respond to this change effectively.
- 3)** To develop the appropriate measures of student success and assessment strategies to support continuous improvement and development in innovative programs, partnerships, curricula, classroom practices and all course modes.
